

Home Assignment – Generalist Technical Artist

Reference Gameplay Recreation & Fish of Fortune Reskin

Objective

You will receive a **reference gameplay video**. Your task is to:

1. **Recreate the gameplay** shown in the reference video as a web-based game using **Three.js**
2. Deliver **two versions**:
 - **Primitive Prototype** (using only code based primitive assets)
 - [Fish of Fortune](#) **Styled Version**

Provided Materials

- A reference gameplay video

Requirements

1) Gameplay Recreation

Recreate the core interaction and flow from the video, including:

- Main mechanic and rules
 - Interaction method
 - Composition
 - Win condition
 - Timing and pacing
-

Deliverable Versions

Version A – Primitive Prototype

Requirements:

- Use primitives only (cubes/spheres/planes/basic colors)
 - Minimal UI allowed (simple shapes/flat overlays)
-

Version B – Fish of Fortune Styled Version

Requirements:

- Keep the same gameplay as Version A
- Reskin to [Fish of Fortune](#) aesthetic:
 - environment tone / objects style / materials/lighting / color palette and readability

Vibe coding requirement

Deliver **3 documented versions**:

- **v1 (primitive)**: gameplay matches the reference video using primitives only (boxes/spheres/planes). Win state included.
- **v2 (feel)**: improve responsiveness + timing (input, easing, pacing).
- **v3 (polish)**: add juice (feedback/VFX/UI reactions + nicer win transition).

For each version include in README:

- what changed / why it improved feel / exact values tuned
-

Tools

Dev

- VS Code
- Node.js **LTS**
- Vite + Three.js

AI

- Use coding agents: Cline / Copilot / Gemini / Claude / Cursor
- Export prompts to `/ai_logs/*.txt`

Assets

- **Blender (GLB)**
- **Figma or Photoshop** (UI exported as **PNG or JPG**)

Technical requirements

- Runs locally:
 - `npm install`
 - `npm run dev`

Deliverables

Submit one ZIP file containing:

```
/primitive_version  
/styled_fof_version  
/assets  
/ai_logs  
/README.md
```

Both versions must run locally.
