Experience building interactive HTML5 playable ads using web-based game frameworks	0	0	NA
Experience with JavaScript / TypeScript	0	0	NA
Experience with Node.js	0	0	NA
Experience with Pixi.js	0	0	NA
Experience with Three.js	0	0	NA
Experience with Unity or Unreal Engine	0.5	2	Recently

Key questions:

1. Reason for leaving the last place of work: company-wide layoffs.

2. Do you have Mobile gaming industry experience? 5+ years

3. Do you have experience working in GitHub?

I have daily experience with Git, including branch management, merging, and resolving merge conflicts. While my commercial experience was not specifically with GitHub, I'm comfortable working with Git-based workflows and can quickly adapt to GitHub.

4. Do you have experience in GLSL or custom shader experience?

I have practical experience configuring and integrating shaders and materials within a production pipeline. Although I have not developed custom GLSL shaders, I understand shader workflows and I'm currently expanding my technical knowledge through Unity.

5. Do you have experience creating mobile game animations, UI animations, VFX, and gameplay feedback?

Yes. I have experience implementing UI animations, particle effects, shaders, materials, 2D comic animations, state-switching mechanisms, audio integration, and technical setup of both 2D and 3D assets for mobile games.

5. Do you have experience using AI tools, agentic workflows, and AI coding assistants?

Yes. I regularly use AI tools including ChatGPT, Claude, Gemini. I use AI daily to assist with Unity scripting, learning C# and Python, workflow optimization, technical problem-solving, and visual content generation.
